Performing Manufacturing Operations QCF/NVQ

Performing Manufacturing Operations

These QCFs/NVQs are suitable for those currently working in manufacturing operations and who wish to gain recognition of their competence in a variety of manufacturing activities.

The qualifications can help improve career development opportunities and can be gained on the job.

QCF/NVQ Level 2

QCFs/NVQs are organised into levels, based on the competences required.

Career Opportunities on release

This qualification will support your job application for roles within the production and manufacturing sectors ranging from Production Operative to Production Supervisor/Manager.

Qualification Requirements

2 Mandatory Units, 3 Optional Units, 1 Job Specific Unit

To achieve the qualification, learners must complete mandatory units which cover:

- complying with statutory regulations and organisational safety requirements
- promoting effective working relationships

Learners must also achieve 3 optional units, which may include:

- transferring materials
- preparing for manufacturing operations
- concluding manufacturing operations

There is also one job specific unit, which may cover:

- produce assemblies
- joined products
- formed products

There are a variety of optional units to suit your role. A QCF/NVQ can be achieved in 12 weeks in your workplace.
